

Expanded Polystyrene (EPS) Packaging Recycling Program

What is the EPS Recycling Program?

There are many different forms of Foam Packaging used to package Kodak Polychrome Graphics products. This brochure is designed to provide information on the proper disposal and recycling of Expanded Polystyrene (EPS) Packaging.

What is Expanded Polystyrene Packaging (EPS)?

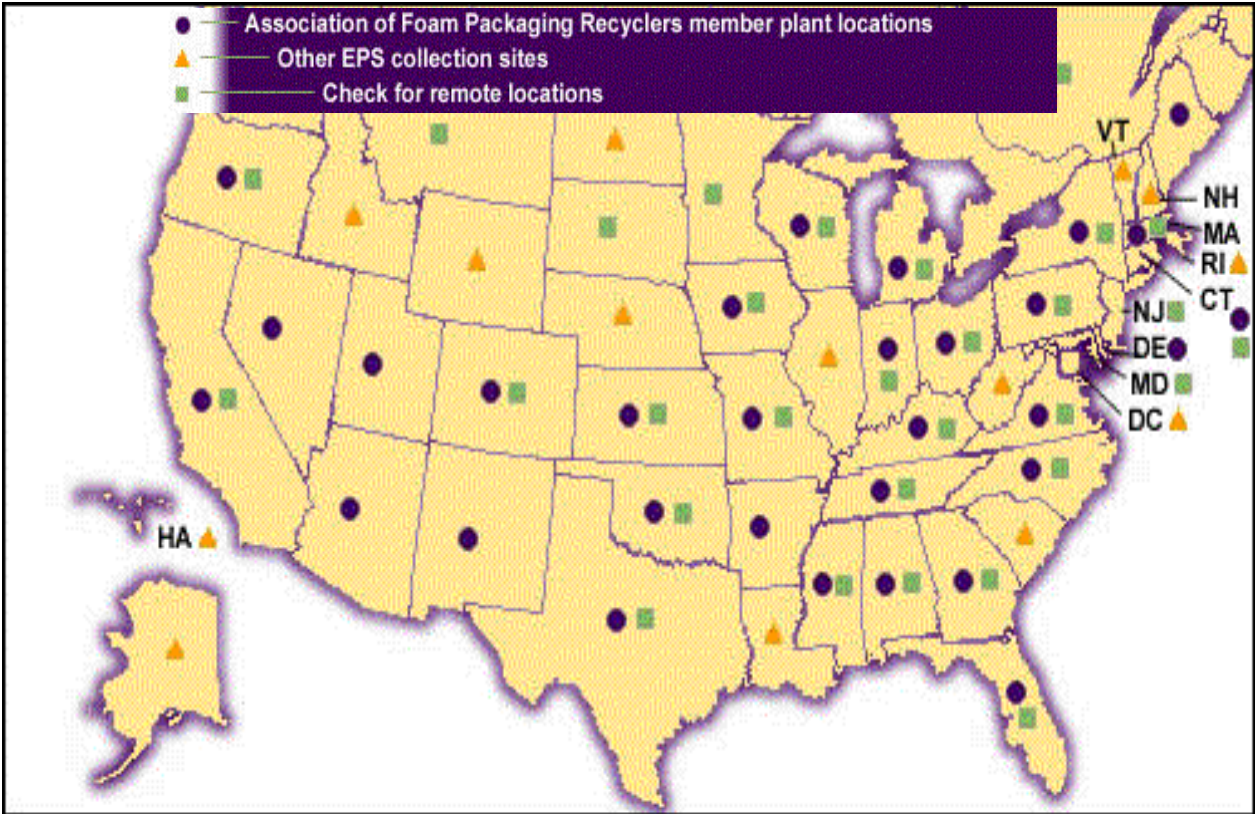

Expanded polystyrene foam packaging is the familiar white material that cushions, insulates and protects all types of products during distribution. This includes custom shaped material used to package electronic equipment and appliances, loose fill packaging often called "peanuts", blocks of foam which protect furniture and appliances and shipping containers used to help preserve perishable foods and medicines.

According to the Alliance of Foam Packaging Recyclers (AFPR), EPS is safe in landfills and can be recycled. There are over 200 recycling locations across the United States, to make recycling your EPS Foam Packaging waste simple.

How do I participate?

- Contact the Alliance of Foam Packaging Recyclers (AFPR) at (410) 451-8340 and ask for the nearest EPS packaging foam recycling center to your facility.
- Refer to the following map to get an idea where these facilities are located. Expanded polystyrene (EPS) foam packaging is an excellent material for recycling. This map will help you identify the best method to get your foam to the nearest and most convenient collection center.

Expanded Polystyrene (EPS) Packaging Recycling Collection Sites

What do I do?

- Once you have identified the closest collection site, call them to verify drop-off times and check to see what types of polystyrene material they accept. Kodak Polychrome Graphics *will not* be responsible for any transportation or other costs incurred.
- Make sure your EPS is clean and free of any plastic film, loose parts or glued-on cardboard.
- Each EPS collection site has distinct criteria regarding the types of material they can accept. The locations provided are intended to include recycling centers for expanded polystyrene transport packaging ONLY. To obtain information about other polystyrene recycling opportunities, including foodservice, rigid durable goods and other plastics, please send your request by email to www.epspackaging.com or call AFPR at (410) 451-8340 to be referred to the correct information resource.

What happens to the EPS foam when it is recycled?

EPS protective foam packaging can be recycled and reused in several ways:

- AFPR members reprocess up to 60% of the post consumer foam collected and incorporate it directly into new packaging.
- Some of the material is extruded for use in a wide variety of durable plastic products.
- Loose fill packaging "peanuts" can be reused at thousands of participating mailing services around the country. Call 1-800-828-2214 for the location nearest you.

More Information

This service is part of Kodak Polychrome Graphics Printer's Enviroservices Program (PEP). This consists of a comprehensive range of environmental and safety products and services specially designed to provide printers with cost effective solutions. For more information, please contact the KPG Environmental, Health & Safety Department at (877) KPGraphics or e-mail at PEP@KPGraphics.com.

Notice to User:

The services to be provided under this offer are to be performed solely by Independent Companies from whom Kodak Polychrome Graphics does not receive any fees. There are no warranties, express or implied, in connection with the provision of this service, including but not limited to the implied warranties of merchantability and fitness for a particular purpose. The user shall determine the suitability of this service for the intended use, and the user assumes all risk and liability if this service is not fit for the particular purpose intended. Kodak Polychrome Graphics shall not have any obligation or liability to any user or other third party arising out of any services performed by Independent Companies referred by AFPR, pursuant to this offer.
